Abstract of JP2000112746

PROBLEM TO BE SOLVED: To prevent the delay of a schedule, the excess of a budget, the degradation of quality, etc., due to the lag of a resource procuring date by managing the timing of starting the procurement of resources varying according to the progressing situation of a project at the procurement of resources in the project of software development, etc.

SOLUTION: A resource procuring auxiliary device quickens the procurement of resources required for development with a proper timing to help the procurement in the case of executing development consisting of plural processes. Then the device is provided with a resource procurement quickening means 9 which decides the beginning resource procurement starting date of each process from a period required for procuring the resources required for each process and the starting scheduled date of each process and corrects the beginning resource procurement starting data based on a development progressing situation result to quicken the procurement of the resources with the timing, based on the corrected resource procurement starting date.
